ATS final gear for Nissan 350Z / 370Z

* Parts # R7A16-35

* Gear Ratio 4.111 (Teeth 37 / 9)

* Compared to the stock final 3.538 (350Z), the ATS final makes gear ratio 16.2 % shorter generating a better acceleration for each gear.

* The final gear is treated by ATS temper shot (special shot peening) for a superior durability. In addition each tooth is thicker and stronger than the Nissan Frontier 4.08 final whose teeth count is 49 / 12.

* Application: For 350Z / 370Z manual transmission. For a customer with AT, a change of differential is required.
