

Metal Twin clutch for Honda S2000 & ACURA NSX

ATS has released newly designed metal twin clutch for Honda S2000 and Acura NSX. This performance clutch can enhance the driving pleasure for the tuned S2000 and NSX. It is offered with two clamping rate—1,100kg and 1,350kg. The clutch can handle 450 hp with the 1,100kg clamping rate and 550 - 600 hp with the 1,350kg clamping rate. Perfect for the turbo or super charged S2000 and NSX.

The clutch is a push type and the kit comes with all the necessary pull—push conversion parts. **Especially S2000 clutch comes with a new conversion kit (version 2) with Nissan slave cylinder and Toyota release bearing which significantly increases the performance of engagement / disengagement of the clutch compared with the previous version.**
