Note  
 \* if the car is equipped with a stock viscous LSD, the ring gear has to be replaced with the one used for an open differential. For a detail informatoin, please refer to ATS.  
 #1: Speedometer drive gear is carved on the differential case. A speedometer driven gear is included.  
 #3: Depending on the model, year, and the stock differential, Honda has 3 kinds of side bearings and 2 kinds of spacers. Make sure to use the one equipped with your car.
