						Metal	Twin		N/A		N/A	

ATS Silent Clutch utilizes the stock dual mass flywheel to reduce the operating noise. The kit does not come with the stock dual mass flywheel.

Note

- #1: Please refer to the standard carbon (or metal) clutch section for the required parts for a pull-push conversion and installation
- #2: Please refer to the standard carbon clutch section for the required bearing & bearing sleeve
- #3: The Nissan CSC (Concentric Slave Cylinder) is removed and the activation is converted to ATS clutch fork, bearing&bearing sleeve, and slave cylinder. Regarding the required Nissan parts for the conversion, please refer to ATS website or contact us.
- #4: Please refer to the standard carbon (or metal) clutch section for the required bearing & bearing sleeve
- #5: Please refer to the standard carbon clutch section for the required parts for a pull-push conversion and installation
